

JULSHI PATEL

Information Technology Student | AI/ML Specialization

Vadodara, Gujarat, India | +91 9724729224 | julshipatel47@gmail.com

GitHub: github.com/julshipatel | LinkedIn: linkedin.com/in/julshi-patel-77a3942a6

PROFESSIONAL SUMMARY

Motivated and detail-oriented Information Technology student specializing in Artificial Intelligence and Machine Learning at Parul University. Proficient in Python, Java, SQL, Pandas, NumPy, Matplotlib, and Seaborn, with hands-on Power BI experience building interactive dashboards for sales, insurance, and UPI transaction data. Strong problem-solving aptitude, quick learner, and collaborative team player seeking to contribute to a technology-driven organization.

EDUCATION

Bachelor of Science in Information Technology (Hons.), AI/ML Specialization

2023 - 2027

Parul University, Vadodara, Gujarat

- Relevant coursework: Data Structures, Machine Learning, Database Management Systems, Python Programming, Java

Higher Secondary Education (Class XII), Science

2021 - 2023

Vidyadish Vidyasankul, Bhavnagar, Gujarat

Secondary Education (Class X)

2020 - 2021

Saint Thomas High School, Mahuva, Gujarat

TECHNICAL SKILLS

Programming Languages: Python, Java, SQL, HTML

Data & Analytics Libraries: Pandas, NumPy, Matplotlib, Seaborn

BI & Visualization Tools: Microsoft Power BI

Core Concepts: Data Structures and Algorithms, Machine Learning, Data Cleaning and Preprocessing, Data Visualization

Languages: English (Proficient), Hindi (Proficient), Gujarati (Native)

PROJECTS

Sales Data Analysis (ElectroHub)

Power BI Dashboard Project

- Built an interactive Power BI dashboard analyzing sales across 8 product categories, including Electronics, Footwear, Clothing, Home Appliances, Accessories, Kitchenware, Bags, and Personal Care
- Identified top and bottom 5 products by sales, profit, and quantity sold, and analyzed daily, monthly, quarterly, and annual sales trends
- Compared sales, profit, and quantity sold across user-selected date ranges; reported total orders, average discount, and city-wise sales, with Product, Date, Customer ID, and Promotion Category filters

Insurance Data Analysis

Power BI Dashboard Project

- Designed a two-page Power BI report analyzing insurance policies and claims, with KPI cards for Premium Amount, Claim Amount, and Coverage Amount
- Created interactive visuals including a donut chart of active vs. inactive policies, a bar chart of premium by policy type, a ribbon chart of claims by status, and a line chart of claim amount by age group
- Built a policy type, claim status, and coverage matrix with Policy Number, Claim Number, and Customer ID slicers, plus a drillthrough page with a detailed record view and Back button

UPI Transactions Data Analysis

Power BI Dashboard Project

- Built a two-page Power BI report analyzing 2024 UPI transactions, with line and column charts of monthly transaction amount and remaining balance
- Added bookmark navigation to switch between line and column chart views of amount and balance
- Created 10 slicers (Transaction Type, Bank Name Sent/Received, Device Type, Age Group, Gender, Payment Method, Merchant, City, Purpose) and a matrix of amount and balance by month, city, and currency

CERTIFICATIONS

Data Analytics Job Simulation - Deloitte

Issued via Forage

- Completed practical job-simulation tasks in data analysis and forensic technology

GenAI Powered Data Analytics Job Simulation - Tata

July 2026

Issued via Forage

- Completed exploratory data analysis and risk profiling tasks, and predicted delinquency using AI-driven models
- Developed a business report and data storytelling narrative for an AI-driven collections strategy

Introduction to Data for Decision Makers Job Simulation - BCG X

July 2026

Issued via Forage

- Completed campaign performance analysis and communicated data-driven findings to support business decisions

AWS Data Analytics_FSP (Gold Category)

July 2026

NASSCOM FutureSkills Prime | Ministry of Electronics & IT, Government of India

- Cleared the AWS Data Analytics assessment aligned to NASSCOM IT-ITeS Sector Skills Council standards; achieved Gold category (70% and above)

KEY ACHIEVEMENTS & STRENGTHS

- Independently designed and built three end-to-end Power BI projects (Sales Data Analysis, Insurance Data Analysis, and UPI Transactions Data Analysis), from raw data to interactive visuals
- Strong foundation in programming, database management, and data science workflows; quick learner and collaborative team player with strong communication skills
